Achievements/Tasks
- Gained a strong foundation in front-end and back-end software development.
- Proficiency in web designing using HTML, CSS and JavaScript.
- Developed back-end applications using Java and SQL.

SKILLS

core java · j2EE · HTML · CSS · JavaScript · Hibernet · bootstrap

PERSONAL PROJECTS

The Smiley Foundation
- The Smiley Foundation provides a common platform between the different charity organizations and NGOs that are working for the same purpose and goals. And also for the common public who wants to join the NGOs. Various charity organizations face difficulty to select reliable NGOs, where they can donate and help. Using this application, they can easily approach NGOs who actually need help and support.
- This application was developed using various technologies including HTML, CSS, Bootstrap, JavaScript, MySQL, Spring Framework and hibernate.

Online Home Service Provider
- This online home service provider can be used for different types of facilities like plumbing, electrician, salon, carpenter, paste control, etc. The application was made very reliable and trustworthy. It provides security to consumers as it tracks and verifies all the background information of different service providers.
- The Project was developed using HTML, CSS, JavaScript, Java and Hibernate.
